BTAindustry
Czech producer of industrial paints

BTA industry a.s. is a purely Czech manufacturing and trading company, dealing with a comprehensive solution of surface treatments in various branches of the metal industry and construction (paints for the protection of various technological units, steel structures, castings, forgings, concrete structures, board materials, roofing, plastics, etc.). The company was founded on the basis of many years of experience of employees in the field of development, production and sale of industrial paints. It provides development of paints according to customer requirements, measurement and complete evaluation of their properties. It has its sales and technical offices in Prague and in northern Moravia in Studénka. It is able to flexibly provide a comprehensive service throughout the Czech Republic, as well as Slovakia and Poland.

Commercial and technical service is provided by experienced workers with many years of experience in the field.

Part of the service is the assessment of the current state of applied paints, design of adequate replacement with regard to quality and economic requirements, implementation of technological tests of new designed paints, final evaluation. This is followed by a comprehensive service of supplies of paints, supplies of materials to the destination, including transport, regular technological supervision...

BTA[®]quality

The company holds
 ČSN EN ISO 9001:2015
 ČSN EN ISO 14001:2015 certificates

Industrial paints

Water-borne

- anti-corrosive paints / 1-K, 2-K /
- top enamels / 1-K, 2-K /
- one-layer anti-corrosion enamels / "one-layer" /
- two-component epoxy water-borne primers
- two-component top polyurethane water-borne coatings
- heat resistant paints
- paints for plastics
- special paints according to requirements

Solvent

- synthetic anti-corrosive paints
- synthetic top enamels
- one-layer anti-corrosive enamels – /"one-layer"/
- two-component epoxy primers
- anti-corrosive zinc-containing primers
- top polyurethane paints
- paints for horizontal road markings
- heat resistant paints

Construction materials and coatings

- interior paints
- facade paints
- paints for concrete
- paints for roofing
- paints for cement-bonded particle board
- paints for wood
- penetrating paints
- special paints

Plasters

- acrylic
- silicone
- silicate

System for rehabilitation of reinforced concrete structures

- renovation mortars with a grain size of 1-3 mm
- adhesive bridge
- preparations for the protection of steel reinforcement
- protective paints for concrete

Agents for pre-treatment of substrates

- environmentally friendly cleaning and degreasing agents

Additional assortment

- spray guns and equipment
- rollers, brushes...

Paint shop services

- wet coating
- powder coating

Areas of application

- engineering
- construction
- foundry
- rolling stock
- automotive
- agriculture machinery
- heating technology
- energy
- plastics
- road construction
